Treatments
New Clients

New clients are advised to book a Bespoke Luxury Facial to help us establish your optimal treatment programme. Our dermal therapists will determine your current skin health and condition through a full consultation, to evaluate and identify initial areas of concern and tailor your treatment accordingly.

Visia® Skin Scanner

Our state-of-the-art Visia® Skin Scanner takes in-depth images of your skin to help our dermal therapists understand its current condition in microscopic detail before prescribing a personalised treatment programme and homecare advice. Either drop in or book your session with our Boutique Team.
